## Monaghan County Council 2022/2023 Winter Service Plan

---

The following report details Monaghan County Council's Winter Service Plan for the 2021/2022 winter service period.

### A1 Document Control

Revision	Prepared by	Revision Details	Date
0.00	Brian Annon	Final Draft	14/10/2022

### A2 Approval List

Role	Name	Signature	Date
Author	Colin Murphy AE	<i>Colin Murphy</i>	04/10/2015
Updated	Brian Annon AE	<i>Brian Annon</i>	14/10/2022
Checked	Adrian Kerley EE	<i>Adrian Kerley</i>	14/10/2022
Winter Service Manager	Kevin West A/SEE	<i>Kevin West</i>	14/10/2022

### A3 Distribution List

Issued To	Organisation / Company	Location
Duty Engineer(s)	Monaghan County Council	Monaghan
Chief Executive	Monaghan County Council	Monaghan
Director of Services, Transport, Community and Rural Development	Monaghan County Council	Monaghan
Health and Safety Officer	Monaghan County Council	Monaghan
Winter Maintenance Manager	TII	Dublin
Fire Officer	Monaghan County Council	Monaghan
District Engineers	Monaghan County Council	District Offices
General Service Supervisors	Monaghan County Council	District Offices
Machinery Yard Overseer	Monaghan County Council	Machinery Yard
Head of Forecasting	Met Éireann	Glasnevin Hill, Dublin 9

## A4 Purpose and Scope

The purpose of this document is to identify the processes, procedures and key personnel employed by Monaghan County Council, to deliver the winter service for County Monaghan. The Winter Service Plan will be amended as necessary during the winter season.

## A5 Policy

### Winter Maintenance Policy Statement

#### 1) Introduction

The Winter Maintenance Service is important in both safety and economical terms. The safe movement of all road users is perceived by the public to be important, especially during periods of snow and ice. Minimising delays and disruption due to bad weather has significant economic benefits. The primary responsibility for road safety remains at all times with the drivers of the vehicles. Each driver must exercise sufficient caution to take account of the prevailing weather conditions.

Monaghan County Council does not have resources available to carry out salting on its entire network. It will endeavour to maintain, clearly identified priority traffic routes in a passable condition, in the interest of maintaining road safety. It is necessary to prioritise the network to establish the level of treatment required for a particular route based on route importance and level of risk.

#### a) Defined Network of Roads

The service aims to prevent ice forming on a 'defined network of roads' which are:-

Route Designation	Description	Level of Service
Priority 1	<b>Priority 1 include the National Primary and National Secondary Roads</b>	These routes are ordinarily treated during winter weather. These routes receive pre and post salting treatment and ploughing when necessary.
Priority 2	<b>Priority 2 includes all Regional Roads and a number of heavily trafficked local roads</b>	These routes are ordinarily treated during winter weather but may have interruptions to treatment in certain severe weather events.
Priority 3	<b>Priority 3 includes footpaths in urban centres and all other local roads.</b>	Not treated as part of the normal winter service but may receive intermittent treatment during certain severe weather events subject to resource availability.

Treatment Route	Priority 1	Priority 2	Priority 3
Mobilisation Time	1 hr	1 hr	When possible
Treatment Time	2 hrs	3-5 hrs	When possible

The 'defined network of roads' comprises approximately 24% of the total road network in Monaghan.

The main activities of the Winter Maintenance Service are treating the roads to:-

- i. Try to prevent ice forming, known as 'pre-salting'
- ii. Melt ice and snow already formed, 'post-salting'
- iii. Remove snow

#### **b) Towns**

The Municipal Districts may carry out additional localised winter maintenance service within the Towns subject to resource availability and prevailing weather conditions. The nature and extent of the service provided will be determined by the District Engineer and the District General Service Supervisor (GSS).

## **2) Organisation Responsibilities**

- The Head of Section for Roads has overall responsibility for operations within the County. The Winter Service Manager is the Senior Executive Engineer for Roads.
- Three Duty Engineers are responsible for the day-to-day implementation of the Winter Service Plan.
- The District Engineer has oversight over the winter maintenance operations on Priority 3 roads. The District General Service Supervisor has responsibility for deciding which Priority 3 roads are treated in their district based on local weather conditions and available resources.
- The District Engineer has oversight over the winter maintenance operations within towns in their district. The District General Service Supervisor has responsibility for determining the need and extent of winter maintenance operations within the towns in their district based on local weather conditions and available resources.
- The District General Service Supervisor has responsibility for mobilisation of the fleet.
- The Local Authority will assist the Emergency Services where possible during adverse weather events.

Before the start of the winter season, which, for Local Authorities is defined as the third Monday in October, the Duty Engineers will organise the routing of vehicles and equipment to cover the defined network of roads.

These routes together with descriptive schedules will then be produced in plan form and placed in the Winter Service Plan.

### 3) Resources

#### a) Vehicles

A fleet of 8 gritting vehicles, complete with snow ploughing blades for 8 vehicles will be provided for salting purposes. These vehicles will be allocated and based in different Districts in accordance with the drivers' routes to be undertaken. In addition, each Municipal District will be equipped with 2 mini gritters capable of spreading 1.5 - 2 tonne of salt. The deployment of these gritters is at the discretion of the District Engineer and the District General Service Supervisor (GSS).

#### b) Manpower

- Normal gritting operations will be undertaken as a driver only operation.
- During extreme weather events such as snow, the gritting operations will be undertaken as a Driver plus Helper operations.
- There are 16 drivers available to cover the 8 salting routes and they will be scheduled to work on a week on week off rota basis.
- Driver's aids are also scheduled on rota basis to assist the driver during salting operations.

### 4) Decision Making

All decisions regarding Winter Maintenance Priority 1 and 2 callouts will be made and ordered by the Duty Engineers. The decision for ordering treatments shall be based on a combination of advance weather forecasts, consultation, site inspections and decision matrices, with due regard to available resources. The three Duty Engineers will be rostered on a week on, 2 weeks off schedule. Change over between duty engineers will occur at **9.15am every Monday**.

The Duty Engineer will notify the GSS by phone call in good time to mobilise the fleet and record what time treatment will occur and when this decision was taken. The Duty Engineer will then notify all 16 drivers via text message of the decision for the day. This is to be done irrespective of whether salting is to occur or not. They will also notify the District Engineers by text message before 22.00 hours of what decision or possible decision has/may been taken.

#### a) Weather Forecasts

The County Council receives information from Met Eireann and Vaisala Bureau Service during the months October to April. The following information is received:

- 17<sup>th</sup> October – 30<sup>th</sup> April - 24 hour and 5-day forecasts
- Ice Predication Graphs – Issued approx 2.00pm every day
- Regular Updating Services
- 24 hour Consultancy Service from the Met Eireann

In addition the County Council has access to the Vaisala website which gives information from adjacent counties weather stations.

## **b) Consultation and Site Inspections**

In marginal circumstances the Duty Engineer will not rely solely on the Advance Weather Forecast. He will obtain up-to-date information from the sensors and website and from the Met Eireann Duty Forecaster who is available on a 24 hour per day basis, either before or after any inspection that may be necessary and before he makes a decision i.e. turning out.

## **5) Treatment Decisions**

### **a) Precautionary salting for Preventing Ice Formation (Pre-Salting)**

Decision to treat shall be dictated by a combination of advance weather forecasts, consultation, site inspections and decision matrices. The decision to turn out for normal salting must be conveyed to the appropriate District GSS as early as possible depending on weather conditions so that the treatment can be totally completed if at all possible before road temperatures drop below 0 degrees.

The Duty Engineer should envisage notifying the District GSS of the possibility of salting on any given night before 5.00pm even if a decision has not yet been taken to salt.

The rate of spread of salt for pre-treatment in anticipation of freezing conditions shall be decided using the Treatment Matrices.

### **b) Treatment of Snow Falls (Pre and Post-Salting)**

In the event of a confirmed snow forecast from the Met Eireann Forecaster pre and post - salting should be carried out using the decision and treatment Matrices. Ploughing should commence as soon as the operation is practical.

Private plant and equipment may be hired in if required and is at the discretion of the District GSS. No general mobilisation of equipment will take place until the situation has been fully assessed and then a controlled approach is required.

## **6) Performance Monitoring**

The Duty Engineer and the Drivers will endeavour to ensure that:

- Gritter calibrations are as required at all times throughout the winter period. Pre season and regular ongoing checks must be made.
- The amounts of salt used on each route are recorded.
- The actual weather conditions experienced are recorded.

## **7) Salt Storage**

It is the intention of Monaghan County Council to keep its salt stocks at as high a level as feasible during the season. Currently Monaghan County Council has storage for approximately 3,500 tonnes of salt (enough to do circa 50 pre salting runs for standard frost conditions).

During severe snowfalls and, where resources permit, a contingency plan may be initiated incorporating the provision of grit at strategic locations in each municipal district throughout the county.

## A6 Treatment Routes

The 'defined network of roads' to be gritted, which consists of Priority 1 & 2 roads, are treated via 8 separate gritters covering 8 treatment routes. The 8 routes are described below and are highlighted on the Treatment Routes Map in Appendix (ii) of this report.

---

**Route : Red Route in the following sequence - to be read in conjunction with map.**

Monaghan town North road to Plantation road, Plantation road to Glaslough street, Glaslough street to North road, North road junction with R135 to Coolshannagh Roundabout, Coolshannagh Roundabout N12 to the border (Middletown road), L1300 Pipers Bridge to L1301 Newmans bridge, L1301 Newmans bridge to R185, Junction of L1301/R185 to junction of R185/N12, Junction of R185/L1301 to Glaslough school L1210, L1210 to N2 Emyvale, N2 Emyvale to Moy Bridge, R186 Scotstown junction to Drumferrer NI Border, R186 Bragan Cross to junction of L1160/N2 Emyvale.

---

**Route: Light Blue Route in the following sequence - to be read in conjunction with map.**

R188 Rockcorry to Border, R189 Tanagh to Newbliss, R183 Newbliss to Clones, R212 Clones to Scotshouse, R212 Scotshouse to Redhills road to the Border, R212 Scotshouse to Bells Cross, Bells Cross to Drum to Cavan border, Bells Cross to Newbliss. R189 to junction with L64112, L64112/R189 junction to junction of L24112/L2411, Junction of L24112/L2411 TO Junction of L2412/R183.

---

**Route: Green Route in the following sequence - to be read in conjunction with map.**

L1402 (St Macartans Cathedral) to junction of L1402/R213, junction of L1402/R213 to N2 Castleshane, junction of L1402/R213 to N12, R162 Monaghan town to Swans Cross, R188 Swans Cross to Rockcorry, R193 Rockcorry to R190, Junction of R190/193 to R162, Junction of R162/R190 to L3012 Latton, Junction of R162/L3012 to junction of L3010/R190, Junction of R190/L3010 to NI Border, Junction of R190/L3010 to R162 Ballybay, R183 Ballybay to Swans Cross, Swans Cross R183 to R189 Newbliss, R189 Newbliss to Junction of R189/N54 Monaghan.

---

**Route: Purple Route in the following sequence - to be read in conjunction with map.**

N2 Corlatt Roundabout to N2 Coolshannagh Roundabout, N2 Corlatt Roundabout to N54 to Clones town to Border, R183 Newtownbutler Road to Border, Clones Town road past GAA grounds and towards border loop, Clones L2111 to Roslea border, R187 Roslea Border to N54, L1610 to Ballinode, Ballinode to junction of L16102/R186, L2010 Ballinode to Scotstown and on to Knocatallon L1030 and across to Slieve Beagh Hotel, L2000 Scotstown to Tydavnet, L1170 Tydavnet to junction of L1170/N2.

---

---

**Route: Dark Blue Route in the following sequence - to be read in conjunction with map.**

N2 Monaghan Magic Roundabout to R214 Castleshane, R214 to NI Border, N2 (Junction of R214/N2) to N2 Cremartin Roundabout Southbound, N2 Cremartin Roundabout to N2 (Junction of R214/N2) Southbound, N2 (Junction of R214/N2) to Clontibret Chapel L54512, L54512 to Junction of L54512/L5460, Old N2 L3445 Clontibret Chapel to junction of L3445/L3539 Derrynoose Road, L3539 to NI Border, Old N2 L3445 (Junction with Derrynoose rd) to roundabout in Castleblayney, L3410 (McQuillian Stairs road) to Cremartin Roundabout, L3411 Cremartin roundabout to Scotch Corner, L3300 Scotch Corner TO Junction of L3300/L3310 Ardagh Road, L3310 Ardagh Road to R184 junction, L3320 Ardagh Road to Ardagh including spur on L5501 and on to Tommy Martins Junction L1500/R162, R162 to Junction of R188, R162 Junction of R162/L1500 to Ballybay roundabout, R184 junction of R184/R162 to Scotch Corner and on to junction of R184/L3440 Clontibret,

---

**Route: Yellow Route in the following sequence - to be read in conjunction with map.**

N2 Cremartin roundabout Northbound to N2 Castleblayney roundabout including slip roads at Ballybay and Shercock road, N2 Castleblayney roundabout to South Interchange Carrickmacross including link roads and 2 roundabouts to Corr an Tobair, N2 South interchange Carrickmacross to Aclint, L8150 Cloughvalley to Castleross Nursing home, L8170 Drumharriff (old N2) to junction of L8170/N2 Broomfield, L4300 to N53 (Toome), N53 to NI Border Concession Road, N53 Toome to Faughs GAA pitch, Dublin road Castleblayney to York street, Main street to R181 Keady Cross Junction, Keady Cross junction R182 to Newtownhamilton Border, R181 Keady Road (NI Border) to Castleblayney including Henry Street and Beech Corner, Dublin road to N2 Roundabout Castleblayney, N2 Bypass Northbound to Cremartin roundabout including slip roads at Ballybay.

---

**Route: Pink Route in the following sequence - to be read in conjunction with map.**

Castleblayney town Roundabout to R181 Lough Egish Cross road, R181 Lough Egish Cross road to Cavan Border, R178 Cavan Border to Cloughvalley Upper Carrickmacross (Junction R180/R927), R180 Cloughvalley Upper to Lough Egish Cross road. R180 Lough Egish Cross road to Ballybay roundabout R183, R183 Ballybay roundabout to junction of R183/Old N2, L4201 (Junction of L4210/R181 to Tossy Cross junction, L4210 Tossy Cross junction to 5 Crosses Latton, R162 (5 crosses) to Cavan Border (Junction of R162/R192,

---

**Route: Black Route in the following sequence - to be read in conjunction with map.**

Old N2 (Aclint) to Carrickmacross, Drumconrath Road out of Carrickmacross to Meath Border, R179 Carrickmacross to Cavan Border, R178 Carrickmacross to Essexford, Essexford to Inishkeen via Mucker as far as Patrick Kavanagh Graveyard, Inishkeen over Fane river to Finnigans Cross, R179 Carrickmacross to Armagh border, Lidl road to Dundalk road roundabout, Link Road from N53 to R179 via Blackstaff, Horseshoe road at Broomfield.

## **A7 Network Treatment Maps**

The following Network Treatment Maps are included in Appendix A (i) and A(ii) of this Report. These maps are also available for download on the Monaghan County Council

Website at: <https://monaghan.ie/roadtransport/salting-routes/>

### Priority 1 & 2 Treatment Routes

- Treatment Routes (shows 8 separate Treatment Routes covering Priority 1 & 2 routes)

The meaning of the route priorities and the level of service to be provided are explained in section A5 of this report.

## A8 Rosters

Details of the duty rosters for the personnel specified below, for the winter service period, will be forwarded to the relevant personnel in advance of the winter service period.

- Supervisors;
- Mechanics and fitters;
- Drivers;
- Duty Engineers

## A9 Public Information

### WHAT IS DONE

Monaghan County Council provides the following winter service:

- Monitoring of road conditions from the middle of October until the end of April, using detailed predictions provided by Met Éireann, roadside weather stations, and ice prediction software.
- A fleet of Eight dedicated gritters for spreading salt on a strategic network of Priority 1 & 2 roads whenever road frosts are forecast. This network is detailed in Appendix A(i).
- Eight lorry-mounted snowploughs for use during significant snow/sleet conditions.
- Maintains each year, a salt storage capacity of approximately 3,500 tonnes, adequate to provide 50 operations of precautionary salting on the designated routes for a standard night.
- Treatment for approximately 610km of Priority 1 & 2 road network.
- Winter Maintenance Operation updates via social media

In general all other roads will not be dealt with except where they become impassable due to severe and/or prolonged cold spells and will only be dealt with after designated roads have been addressed and resources are available. Furthermore, in cases of extended extreme weather events (such as that which occurred in the winter of 2009/2010 and 2010/2011), it may be deemed necessary to concentrate resources on those sections of the strategic network designated as Priority 1.

Driving in winter conditions involves particular risks. The Government of Ireland website provides useful advice for motorists on how best to deal with these risks, a Be Winter Ready booklet is available to download from the following website:

<https://www.winterready.ie/en>

## SERVICE LIMITATIONS

Despite the resources that are applied to providing the winter service, ice-free roads cannot be guaranteed. The motorist should remember the following:

- Approximately 76 % of roads are NOT routinely salted.
- In Ireland there are a high proportion of marginal nights when temperatures are very close to zero. This makes it more difficult to accurately predict frost than in colder countries. As a consequence Met Éireann can only guarantee 80% accuracy in their forecasts
- It can take up to 4 hours to salt a route, so any journey may start or end on an untreated section of the route.
- In heavy rain, salt can be washed away and the wet surface may subsequently freeze if the temperature falls below zero.
- In cases of extended severe weather events, the network salted may have to be reduced to Priority 1 routes only.
- **Spreading of Salt does not mean that the road surface will necessarily be ice free. In freezing conditions always drive with great care even if the road has been salted.**

It's your responsibility to be aware of the dangers of adverse conditions and to drive appropriately.

- During cold weather check the Met Eireann weather forecast.
- If frost or snow is predicted, plan to leave earlier for your journey or avoid it completely.
- Tyres should have plenty of tread and be correctly inflated. Tyres are a vital component; remember they are only contact with the road surface.
- If possible, take a route that avoids steep hills of severe bends.
- In as much as is possible, stick to the main/treated roads.
- Remember and accept that journey times will be longer during severe cold weather.
- Make sure your vehicle is "warmed-up" and clear of ice. Ensure the wipers and washers are working correctly.
- Keep washer bottle topped up with suitable screen wash. Have de-icers and scraper in your vehicle.
- Remember to drive slowly in a low gear, rather than braking on hills and bends.
- Leave adequate distance between you and the vehicle in front of you.
- Drive with your dipped headlights on. Use fog lights if visibility is severely reduced. But remember to turn them off when visibility improves.
- If in doubt, stay at home until conditions improve. Your priority is the safety of you, your passengers and others.

## A10 Historical Gritting Events

The number of times the winter gritting crews are called out to salt the Scheduled Routes depends on the severity of the weather and the Icecast forecast during the season. The numbers of call-outs in past seasons were as follows:

### Salting Records for Monaghan County Council 2003 – 2022

Season	Oct	Nov	Dec	Jan	Feb	Mar	Apr	Total	Salt used (tonnes)	Salt/callout (tonnes)
2003/2004	0	4	9	12	1	4	0	30	N/A	
2004/2005	0	2	8	6	7	3	0	26	N/A

## A11 Purchase a Salt Bin Scheme

In 2011 Monaghan County Council introduced the “Purchase a Salt Bin Scheme” which allows Local Community Groups, Businesses, Schools, Churches and the general public to prepare themselves for the winter period at a reasonable cost. **It is up to the community group/school/business to source their own salt after the first fill has been used.**

Capacity (kg)	400
Length (mm)	1020
Width (mm)	610
Height (mm)	1020

Application forms, which include prices and purchase options can be downloaded from:  
<https://monaghan.ie/roadtransport/salt-bin-scheme/>

Application forms are also be available from each of the following offices

MUNICIPAL DISTRICT	TELEPHONE
Carrickmacross/Castleblayney District Office	042.9661236
Ballybay/Clones District Office	047.51018
Monaghan District Office	047.73777

Applications for Salt Bins will be subject to Availability and Terms and Conditions. **Application Forms together with payment to be returned to Monaghan County Council, Roads Section, MTEK II, Knockaconny, Monaghan.**

**MONAGHAN COUNTY COUNCIL WILL NOT BE REFILLING THE SALT BINS AFTER THE FIRST FILL HAS BEEN USED.** A list of local salt suppliers is available on the Council's Website.
